social: @eugrdrn

Passionate software engineer based in Moscow Area.  
I focus mostly on full stack web and iOS development.

## Experience

### 2019-21 **Chatfuel, Frontend Engineer**

- Leading development of SwiftUI based native iOS app
- Developing product's core feature – WebGL based visual editing tool
- Together with team successfully launched Instagram integration
- Participated in resource and process development (continuous delivery pipeline, code review and styling best practices, architecture reviews)

### 2019 **JayDevs, Mobile Developer (part-time)**

- Conducted and developed two social networking mobile applications @ NDA

### 2017-19 **EPAM, Software Engineer**

- Reduced TTI of mobile app checkout process for 15% by migration on newer API on backend side @ Adidas <https://apps.apple.com/de/app/adidas/id1266591536>
- Designed and developed sharable validation contract for usage on mobile and backend sides @ Adidas
- Implemented MVP of graph data visualization management tool @ the largest Russian bank
- Led a team of 3 people
- Participated in resource development

## Contribution & Volunteering

### 2018-19 **EPAM x WebPurple, Student mentor**

- Developed educational materials and website <https://learn.webpurple.net>
- Taught basic Frontend development knowledge

### 2019 **EPAM, React Global Program mentor**

- Taught production-ready React stack development

### 2016-17 **WebPurple, Open Source Developer**

- Developed web-based community site <https://www.webpurple.net>

## Education

2013-18 Specialist of Applied and Computational Mathematics
